PROFESSIONAL SUMMARY

Data Scientist and Machine Learning practitioner with hands-on experience building end-to-end data science solutions, from data collection and ETL pipelines to feature engineering, model training, evaluation, and deployment. Currently a Research & Data Analyst at Liaxon Consulting, with a completed Data Analyst internship at Bluestock Fintech. Skilled in Python, SQL, Pandas, Scikit-learn, XGBoost, NLP, and recommendation systems. Built and deployed an XGBoost classification model on 1M+ bank transactions (90% accuracy, 0.91 weighted F1-score) served through FastAPI REST APIs, and a financial analytics platform covering 92 Nifty 100 companies on Streamlit Cloud.

PROFESSIONAL EXPERIENCE

Research & Data Analyst – Liaxon Consulting *Aug 2026 – Present*

- Conduct market research and industry analysis to identify business opportunities and potential leads for consulting clients.
- Collect business data from multiple online sources using Python-based web scraping.
- Clean, validate, enrich, and segment datasets using Python, Pandas, and SQL to perform quantitative analysis and statistical modeling, ensuring data accuracy and identifying trends that support business decisions.
- Develop dashboards, reports, and visualizations to communicate insights and track lead generation.

Data Analyst Intern – Bluestock Fintech *Jun 2026 – Aug 2026 | Remote*

- Built the Nifty 100 Financial Intelligence Platform covering 92 companies across 10 sectors: ETL pipelines loading P&L, balance sheet, and cash flow data into a 20+ table SQLite database (GitHub).
- Developed a ratio engine computing 100+ financial KPIs (ROE, ROCE, CAGR, valuation, cash-flow quality) and 6 multi-factor stock screeners with peer benchmarking.
- Deployed an 8-page Streamlit dashboard on Streamlit Cloud (Live Demo); auto-generated 92 company PDF tearsheets and 10 sector reports; 61/61 Pytest tests passing.
- Capstone: built a Mutual Fund Analytics Dashboard analyzing 40 schemes from NAV data (Sharpe ratio, alpha, 3-year returns) with Power BI, Streamlit, and automated weekly HTML reports (GitHub).

EARLIER ROLES

Store Administrator – Hotel Florence *Jul 2024 – May 2025 | Yerevan, Armenia*

- Managed inventory, billing, and vendor data; improved stock-tracking and audit compliance.

Line In-Charge (Finishing Goods) – APTIV *Jul 2021 – May 2023 | Chennai*

- Tracked production/dispatch records and identified inefficiencies that improved workflow performance.

Quality Control Technician – LGB *Apr 2020 – Jun 2021 | Coimbatore*

- Conducted inspections and documented results to ensure compliance and traceability.

EDUCATION & CERTIFICATIONS

A.R.J. College of Engineering & Technology – Mannargudi *2019*

B.E., Mechanical Engineering

Data Analyst Internship – Bluestock Fintech *Jun 2026 – Aug 2026*

Credential ID: BFDA80145 | Verify

Master Data Science Program – HCL GUVI *2026*

Verify

TECHNICAL SKILLS

Programming & Querying: Python, SQL

Machine Learning: Scikit-learn, XGBoost, Supervised Learning, Classification, Predictive Modeling, Feature Engineering, Class Imbalance Handling, Model Evaluation (Accuracy, F1-Score), Recommendation Systems, Content-Based Filtering, Cosine Similarity

Deep Learning & AI: TensorFlow, PyTorch, Natural Language Processing (NLP), NLTK, TF-IDF, Text Preprocessing, Computer Vision, Generative AI (LLMs, RAG)

Data Science & Analysis: Pandas, NumPy, Data Cleaning & Preprocessing, Data Wrangling, Exploratory Data Analysis (EDA), Statistics & Probability, Statistical Modeling, ETL Pipelines, Web Scraping

Data Visualization: Matplotlib, Seaborn, Plotly, Power BI, Tableau, KPI Dashboards, Business Intelligence (BI)

Deployment & MLOps Tools: FastAPI (REST APIs), Model Deployment, Streamlit, Git & GitHub, Pytest, PostgreSQL, SQLite, SQLAlchemy, Selenium, PyMuPDF

Cloud Platforms: AWS, Azure (Basics)

Soft Skills: Communication, Problem Solving, Business Understanding

PROJECTS

AI-Powered Banking Product Recommendation System

Python, PyMuPDF, Regex, Pandas, XGBoost, Scikit-learn, FastAPI, PostgreSQL, Streamlit

- Built an ETL pipeline that parsed 1,000 bank statement PDFs (PyMuPDF, regex) into 1M+ transactions, categorized into 24 spending categories.
- Engineered 20+ customer features (monthly spend, EMI ratio, debit-credit ratio, cash withdrawal ratio, weighted risk score) and trained an XGBoost classifier with class-balanced weights, achieving 90% test accuracy and 0.91 weighted F1-score across 4 products.
- Generated top-2 product recommendations with confidence scores and explainable reasons; served them through FastAPI REST APIs on a 7-table PostgreSQL database with a Streamlit dashboard.

IMDb Movie Recommendation System

Python, Selenium, NLTK, TF-IDF, Scikit-learn, Streamlit

- Scraped data for 4,300+ movies released in 2024 from IMDb using Selenium, then cleaned and explored the dataset.
- Preprocessed movie storylines with NLTK and vectorized them using TF-IDF.
- Built a content-based recommender using cosine similarity to suggest similar movies, served via a Streamlit app.

Swiggy Restaurant Recommendation System

Python, Pandas, Scikit-learn, StandardScaler, One-Hot Encoding, Streamlit

- Cleaned restaurant data by handling missing values, splitting multi-cuisine entries, and capping outliers at the 99th percentile.
- Engineered features by scaling rating, rating count, and cost with StandardScaler and one-hot encoding city and cuisine.
- Built a content-based recommender using cosine similarity, with a Streamlit app filtering by city, cuisine, budget, and rating.

LANGUAGES

English, Tamil
